ORYX

Today's bathroom is often acknowledged as an important aspect of the living space. A carefully designed space to feel, create sensations and let your imagination run wild. Relaxation, comfort, & aesthetic pleasure... Saudi Ceramics considers the bathroom a complete space in which design and wellness melt into one. A personalised space that meets all the needs and wishes of every client.

That is why for Saudi Ceramics every project is unique. The most advanced technology and new aesthetic trends are being used to develop high quality, modern products. Exceptional products pass the most demanding quality controls on the market and make this company an international reference.

New trends will continue to be decisive for Saudi Ceramics. New ideas, new designs and new formats create a new concept of the bathroom a space in continual transformation for tomorrows society.

ORYX is a brand by Saudi Ceramics offering luxurious sanitary ware for those who are looking for modern solutions elegant look for their bathroom at very competitive price.

ORYX developed its look & feel, image, brand identity, and visual appearance to stand out in the region and enforce its position in the market.

ORYX is a majestic species of desert antelope which inhabit the Arabian Peninsula and different parts of the African continent. Arabian ORYX is characterized by the White color and harmonious body with beautiful eyes for poets who sings of beauty.

Rimless Water Closets

RIMLESS toilet design has fast become the norm in new toilets. With benefits including easier cleaning, added hygiene and overall superior flushing, this game changing toilet feature will make a huge difference in your new bathroom.

What's the difference between a traditional toilet and a rimless toilet?

- Traditional toilets have a rim around the inner pan of the toilet where when you flush, the water distributes from underneath the toilet rim to dispose of waste.
- Rimless toilets on the other hand, flush water around the whole pan with a superior flushing mechanism that removes the need for a rim altogether.
